Professional Summary

I am an entrepreneurial operator, self-taught technology architect, and high-performance sales professional with a proven track record of aggressive revenue generation and cross-functional leadership. I excel at identifying pain points, navigating complex sales cycles, and managing end-to-end client acquisition for high-net-worth individuals and enterprise founders.

As a systems-thinker, I leverage my deep experience as a technology founder to eliminate operational bottlenecks, align sales and marketing technology stacks, and deploy AI-driven business intelligence platforms. **Demonstrating my ability to drive immediate results, I recently generated R1 million (ex VAT) in high-ticket sales within a 90-day period.**

I am highly proficient in bridging the gap between cutting-edge software innovation and sustainable financial growth, making me exceptionally well-suited to drive enterprise value and aggressively scale automotive sales pipelines.
